Omar grew up in Vancouver, Canada and moved to England at the age of 27. He spent 11 years in London before moving back to Vancouver in 2018.

Omar has the skin condition Vitiligo. He first developed a heart shaped patch in the middle of his forehead at the age of 19. Over the next 20 years his hands and feet became almost completely white and by his late 30's, he began to develop patches around his eyes, across his forehead and around his neck. Omar is in his early 40's now and is embracing his unique and very individual vitiligo beauty.
